

Darwin
PRIVATE HOSPITAL

Sessional Oncologist Required

Darwin Private Hospital is a 100-bed facility that is co-located with Royal Darwin Hospital. It provides a high level of acute healthcare services to the communities of the Northern Territory, North Western Australia and South East Asia.

DARWIN PRIVATE HOSPITAL IS SEEKING TO APPOINT A FLY-IN SESSIONAL ONCOLOGIST

The community of Darwin is experiencing a critical lack of access to medical oncology services. We wish to attract the support of a caring Oncologist who is willing to work with us to provide much needed coverage for the local people of NT.

Darwin Private Hospital has a Day Chemotherapy Unit that is backed up by a dedicated team of oncology nurses and allied health professionals. Specialist Consulting Suites will be provided and a range of other supports available to an Oncologist looking to develop a private practice in NT.

We have general physicians who are willing to undertake a shared care arrangement and provide assistance with the day-to-day management of patients.

For information regarding this opportunity or the services provide by Darwin Private Hospital please contact the General Manager, Darren Rogers on:
